

Gerbrand Ceder is The Chancellor's Professor of Materials Science and Engineering at UC Berkeley. He received an engineering degree from the University of Leuven, Belgium, and a Ph.D. in Materials Science from the University of California at Berkeley in 1991. Between 1991 and 2015 was a Professor in Materials Science at the Massachusetts Institute of Technology. Dr. Ceder's research interests lie in the computationally driven design of novel materials for energy generation and storage. He has published over 350 scientific papers, and holds several U.S. patents. He has served on MIT's Energy Council as well as on several DOE committees, including the workgroup preparing the Basic Needs for Electrical Energy Storage report, and has advised the government's Office of Science and Technology Policy on the role of computation in materials development, leading to the Materials Genome Initiative. He is a Fellow of the Materials Research Society and a member of the Royal Flemish Academy of Arts and Sciences. He has received the MRS Gold Medal, the Battery Research Award from the Electrochemical Society, the Career Award from the National Science Foundation, and the Robert Lansing Hardy Award from The Metals, Minerals and Materials Society, as well as several teaching awards. He is a co-founder of Computational Modeling Consultants, Pellion Technologies, and The Materials Project.
